SUBJECT INDEX

ACERMI, p. 29
Aircraft
  aging, p. 380
  corrosion prevention, p. 380
  panther skin, p. 380
  polyisocyanurate, p. 380
  safety, p. 380
  strain reduced Al skin, p. 380
  stress analysis, p. 380
Allophanates, p. 264
Automotive seating, pp. 43, 350
  cushioning performance, p. 350
  durability, p. 350
  high resilience foam, p. 350
Biurets, p. 264
Blowing agents, pp. 114, 132, 144, 222, 246, 320
  alternative, p. 159
  gaseous, p. 144
  HFC, p. 144
  zero ODP, p. 144
Carbodiimides, p. 264
Carpet underlay, pp. 264, 516
Catalyst evaluations, p. 320
Cell size reduction, p. 57
Cellular solids, p. 285
CFC-11, pp. 57, 114
CFC
  alternatives, p. 320
  -free foams, pp. 13, 178
  removal/elimination, p. 294
  replacement, p. 29
Chemical attack, p. 159
Chlorodifluoromethane, p. 132
Composites, p. 285
Diffusion coefficients, pp. 29, 114, 159, 478
Diffusion models, p. 29
Effective diffusion coefficient, p. 29
Emissions, p. 114
Epoxy, p. 556
Foam
  aging, p. 29
  appliance, pp. 366, 589
  blow efficiency, p. 208
  certification, p. 29
  CFC-free, pp. 13, 178
  characterization by IR, p. 264
  closed cell, p. 280
  composites, p. 493
  density, pp. 208, 280
  dimensional stability, p. 57
  durability, p. 208
  emulsion, p. 589
  fatigue, p. 264
  firmness, p. 208
  flexible slabstock, p. 178
  formulation optimization, p. 208
  high mechanical strength, p. 178
  high resiliency, p. 320
  high water, p. 178
  HR, p. 43
  insulation, pp. 366, 589
  low compression set, p. 178
  low discoloration, p. 178
  low IFD, p. 178
  manufacturing, p. 246
  polyisocyanurate, p. 222
  polyurethane, pp. 57, 144, 178, 222, 246, 280, 320, 350, 366
  reduced index, p. 178
  rigid, pp. 132, 159, 222, 366, 589
  slab, p. 264
  soft flexible, p. 178
  solid, p. 285
  statistical analysis, p. 208
  syntactic, p. 556
  thermal conductivity of, p. 366
  urethane, p. 132
Footwear, pp. 13, 294
Gas chromatograph, p. 29

(continued)

Subject Index (continued)
HCF-134a solubility, p. 159
HCFC-141b, pp. 114, 222, 366
HCFC-22, pp. 132, 144, 159, 366
  123 blends, p. 159
  141b blends, p. 159
  compatibility, p. 144
  foam trials, p. 144
  lower density, p. 366
  properties, p. 144
  stability, p. 144
High IFD, p. 43
High load building, p. 43
Hydrochlorofluorocarbons, p. 222
Insulation, pp. 222, 366, 589
Internal mold release, p. 493
In-use traffic testing (carpet), p. 516
Kinetics, p. 320
Liners, p. 159
Low boiling agents, p. 159
Methylene chloride, p. 246
Microcellular elastomers, p. 294
Microspheres, p. 556
NORD, p. 29
ODP zero, p. 159
Ozone depletion, p. 132
Perfluoroalkanes, p. 589
Pollution prevention, p. 246
Polyester, p. 294
Polyether, pp. 13, 294
Polyisocyanurate, pp. 114, 222, 380
Polyols
  filled, p. 43
  modified TDI, p. 264
  PHD, p. 43
  polymer, p. 208
  polyurea filled, p. 43
  water/base, p. 208
Polystyrene, p. 556
Polyurethane, pp. 13, 29, 57, 159, 222, 246, 280, 285, 294, 320, 350, 366, 478, 516
Post mold expansion, p. 493
Prepolymer, p. 294
R-22, p. 132
Rate of rise, p. 320
Refrigeration industry, p. 159
Shoe soling, p. 294
Sorption
  Delft set-up, p. 478
  measurements, p. 29
  polyurethane, p. 478
  solubility determination, p. 478
Sponges, p. 285
Stomper fatigue, p. 208
Structural RIM, p. 493
Syntactic foams, p. 556
  castability limit, p. 556
  compressive strength, p. 556
  water absorption, p. 556
  with polystyrene, p. 556
Thermal conductivity, pp. 29, 57, 366
Thermal conductivity aging, p. 57
Vapor pressure, p. 132
Volatile losses, p. 246
Weight loss profile, p. 320

AUTHOR INDEX

Austin, T. H., p. 178
Bart, G. C. J., pp. 29, 478
Baser, S. A., p. 280
Bhattacharjee, T. K., p. 556
Bodnar, T. W., p. 222
Brodt, K. H., p. 478
Cancellier, V., p. 159
Cavender, K. D., p. 350
Cecchini, C., p. 159
Cellarosi, B., p. 159
Christman, D. L., p. 264
Craig, T. A., p. 569
Creazzo, J. A., p. 144
Demmin, T. R., p. 222
Dewhurst, J. E., p. 222
Doerge, H. P., p. 366
du Cauze de Nazelle, G. M. R., p. 29
Eibeck, R. E., p. 222
Floutz, W. V., p. 264
Hager, S. L., p. 569
Hammel, H. S., p. 144
Hicks, J. S., p. 516
Kaufman, C. M., p. 246
Khakhar, D. V., p. 280
Knight, J. E., p. 178
Koch, J. J., p. 222

Koshute, M. A., p. 43
Krueger, D. C., p. 132
Lawler, L. F., p. 208
Limerkens, N., p. 294
Londrigan, M. E., p. 544
Maccari, B., p. 13
Mackey, P. W., p. 493
McLellan, K. P., p. 589
Miller, D. I., p. 516
Moore, D. R., p. 516
Mussini, S., p. 13
Narayan, T., p. 264
Neill, P. L., p. 516
Overcash, M. R., p. 246
Parker, C., p. 222
Peleg, M., p. 285
Phanopoulos, C., p. 294
Pirotta, G. P., p. 159
Randall, D., p. 294
Reichel, C. J., pp. 132, 264, 589
Ridgway, D. H., p. 516
Sacchetti, G., p. 13
Schott, N. R., p. 556
Schroeder, J. M., p. 493
Sepulveda, C., p. 516
Shankland, I. R., p. 114
Smits, G. F., p. 57
Snider, S. C., p. 544
Stilling, H., p. 294
Thoen, J. A., p. 57
Torres, M. J., p. 380
Trout, K. G., p. 544
Valentine, C., p. 569
